GUTTERGRIP DETAILED INSTALLATION GUIDE

Follow these simple steps to install your GutterGrip System.

PREPARE FOR INSTALLATION

- Make sure you have all the necessary tools and GutterGrip components ready before you begin.
- A well-prepared installation makes the process quicker and easier.

PREPARE FOR INSTALLATION

ADMIN@GUTTERGRIP.CO.ZA | 081 244 9667 | WWW.GUTTERGRIP.CO.ZA

STEP 1

ATTACH THE GUTTER BRACKETS

- **Attach the plastic gutter brackets at the higher pre-drilled holes.**
- **Drop the gutter position by one level every 2–3 brackets to create the correct downslope. This ensures that water flows efficiently towards the down pipes when the GutterGrip brackets are installed.**

ATTACH THE GUTTER BRACKETS

STEP 1

STEP 2

ATTACH THE SUPPORT BRACES

- **Attach the brace to the bottom of the bracket and bend the tabs to suit the bracket and the roof profile.**

ATTACH THE SUPPORT BRACES

STEP 2

STEP 3

FIT THE GUTTERGRIP BRACKETS TO ROOF SHEETING

- **Start at the first available roof ridge on the side closest to the downpipe, positioning the first GutterGrip bracket approximately 150 mm in from the edge of the roof.**
- **Following the roof profile, position the remaining GutterGrip brackets at the sheet overlaps along the ridge top, continuing until all brackets have been installed.**

STEP 3

STEP 4

FIT THE GUTTERGRIP BRACKETS TO ROOF SHEETING

- Depending on the pitch of the roof, position the GutterGrip brackets so they are perpendicular to the ground.
- Position the mounting brackets and secure them from the top using the supplied Tek screws.
- Drill the required holes and attach the support braces using the bolts and nuts.
- Tighten securely to ensure a strong and stable installation.

STEP 4

STEP 5

INSTALLATION ALMOST COMPLETE

- **Your GutterGrip brackets are now securely mounted to the roof sheeting.**
- **You are now ready to clip your gutters onto the GutterGrip System.**
- **Your GutterGrip System is now ready for use.**

Strong. Secure. Built to last.

STEP 5

TIPS AND TRICKS

- **Pre-drill the brackets before fitting them to the roof. This will make it easier and quicker to install the Tek screws while working from a ladder.**
- **Tighten the Tek screws securely, but avoid over tightening. Excessive force can damage the roof sheeting or affect the bracket position.**
